

IDT 2016

The International Conference IDT 2016 is the next conference after the International Conference on Digital Technologies that was held in Zilina traditionally. The aim of the conference is to bring together researches, developers, teachers from academy as well as industry working in all areas of information technologies. Young researchers and postgraduate PhD students are greatly welcome to participate in this event. Beside the scientific field, several cultural and social events are planned for enjoyment of the conference attendees. The proceedings of IDT 2015 are indexed in **IEEE Xplore** and **Scopus**.

Special Events

- International Workshop on Biomedical Technologies
- International Workshop on Reliability Technologies

Topics

The conference focuses on a wide range of applications of computer systems. Topics of interest include, but are not limited to:

- · Circuit theory and its applications
- Digital signal processing
- Communication and control systems and networks
- Measurement systems and instrumentations
- Hardware and software solutions
- Innovative eHealth, Applications and Products
- Electronic Health Records and Medical Databases
- Medical Image Analysis and Biomedical Visualization
- Computer-Aided Diagnosis
- Telemedicine, Telehealth and Remote Monitoring
- Reliability analysis and risk estimation
- Testing and fault-tolerant systems
- Accident and incident investigation
- Human factor
- Risk and hazard analysis
- Software reliability
- Data mining and Knowledge discovery
- Education, e-learning

Organized by:

Faculty of Management Science and Informatics, University of Zilina, Slovakia

Polish Chapter of IEEE Computational Intelligence Society

Important Dates

Full paper submission [extended]9 May, 2016Paper acceptance notification6 June, 2016Camera-ready papers10 June, 2016Final program20 June, 2016

Submission of Papers

Prospective authors are requested to send a paper (maximum 12 pages including figures, tables and references) for review by the Scientific Program Committee. All submissions must be written in English, starting with a succinct statement of the problem, the achieved results, their significance and comparison with previous works (if any), as well as a list of references. The submission should also include: title of the proposed paper, authors' names, affiliations, addresses, name and e-mail of the contact author, and topics that best describe the paper. The paper should be submitted electronically.

Publication

All submitted papers will be reviewed by members of the Program Committee. Accepted papers will be published in conference proceedings (CD-version under an ISBN reference). Papers presented at the conference and included in the proceedings will be considered for indexing in **IEEE Xplore** and **Scopus**.

Industry Applications are Welcome!

In an attempt to promote the dissemination of the recent industrial developments and the interaction between industry and academia, IDT 2016 will encourage the submission of industry oriented technical applications. These special contributions should be submitted and will be published in a format that includes a maximum 1-page of abstract. The evaluation of these contributions will address the innovation/originality of the industrial application, the quality of the presentation, and the technical interest to the community working in that field.
